

Anatomy and Physiology

Tissue Review Sheet

1. What are the 4 types of tissues?
2. What are the characteristics of epithelial tissue?
3. What is the function of epithelial tissue?
4. Where are you most likely to find epithelial tissue?
5. How are epithelial tissues classified?
6. What are the different cell types found in epithelial tissue and where are they found?
7. What are the different types of epithelial tissue?
8. What are the functions of each type?
9. Where would you find each type?
10. How is epithelial tissue attached to connective tissue?
11. What type of tissue are glands derived from?
12. What are the two types of glands?
13. What do each secrete?
14. How do they secrete their products?
15. What are the characteristics of connective tissue?
16. What are the different types of connective tissue?
17. Give an example of each type of connective tissue?
18. Compare and contrast epithelial tissue and connective tissue.
19. What are the characteristics of muscle tissue?
20. What are the three types of muscle tissue?
21. What are the characteristics of nervous tissue?
22. What parts make up a neuron?
23. Be able to identify all tissues we have seen in class.
